

November Newsletter

We are now a few weeks into the 2nd quarter of the year. The first quarter went by fast and went well. Once the new quarter started I assigned the students new spots which the younger students were a lot more excited for than the older students. Here's what will be new this month.

- *I will start introducing new games with the K-2nd students (Games that include the skills we worked on during the first quarter)*
- *3rd-6th will do some new sport skills that include: Tennis, Frisbee, and for the first week or so we still have to finish up some things with football.*

The 4th-6th health topics for the month:

- *(Nervous System)*
- *(Respiratory System)*
- *(Alcohol)*
- *(Drugs)*

Mondays will continue to be cardio Monday, Thursdays will continue to be class choice game day, and Fridays will continue to be free days outside as long as weather allows us.
